COMETRON™

CELESTRON CREATED THE FIRST COMETRON product for viewing the passing of Halley's Comet in 1986. While that memorable comet is now far out into space, there's always another one promising to light up the sky. Cometron binoculars continue to be the optics of choice for providing bright, expansive views of one of the best shows on Earth.

SKYMASTER®

A FAVORITE OF AMATEUR ASTRONOMERS

the world over, explore the night sky with our bestselling SkyMaster series. These affordable large-aperture binoculars meet the special demands of astronomical and long-distance terrestrial viewing. A tripod adapter is included to allow for extended use and excellent depth of field views without the need for constant refocusing (excluding 12x60 model).

25X70	#71008		

SKYMASTER® DX

EXCEPTIONALLY BRIGHT AND STABLE to hold thanks to their lower magnification levels and large objective lenses, the SkyMaster DX effortlessly transitions between astronomical and terrestrial viewing. Waterproof and fully multi-coated for a step up from the base SkyMaster models.

8X56	#72022
9X63	#72023

SKYMASTER® PRO

CELESTRON'S SKYMASTER BINOCULARS HAVE LONG BEEN THE MOST POPULAR high

magnification binoculars for astronomical and long-distance terrestrial viewing. We took everything that has made SkyMaster successful and built upon it. The result is the SkyMaster Pro. Better construction, our highest quality optics, friendly to beginners and budgets, yet powerful enough to meet the needs of accomplished star gazers for an unrivaled observing experience. Tripod adapter included.

15X70	#72030
20X80	#72031

CAVALRY

“MAKE ‘EM TOUGH.” When we asked military personnel and law enforcement officers about what they wanted in a binocular, that’s what they said. So that’s what we did. A tough armored exterior and solid construction for dependability in the line of duty.

HUMMINGBIRD™

AN INSTANT CLASSIC, HUMMINGBIRD

is at home anywhere from the tripod to your coat pocket. Like its namesake, this all new "micro" ED glass spotting scope is small, powerful, travels light, and is famous for its dazzling colors.

7-22X50	#52307
9-27X56	#52308

CATADIOPTRIC

THE VERSATILE C5, C90, AND C70 MINI MAK

offer the best of both worlds. We're always asked, "Are they for astronomical or terrestrial viewing?" With wide apertures, high powered magnification, erect image optics, included finderscopes, and compatibility with a wide range of 1.25" eyepieces, the answer is a resounding "YES!" to both.

C5 #52291
C90 #52268
C70 MINI MAK #52238

Tripod not included

LANDSCOUT™

READY FOR ANY ADVENTURE! With a compact and lightweight design, you'll be able to quickly set it up and use the 10-30x or 12-36x zoom to get close to the action. LandScout combines bright, sharp views with a remarkably affordable price. Tabletop tripod included.

50 mm #52320 50 mm - kit #52324
60 mm #52322 60 mm - kit #52325

ULTIMA®

DESIGNED TO PERFORM well in a range of viewing situations, the Ultima spotting scope is a great all-around optical instrument. The rubber-armored, waterproof design, and included soft carrying case protect Ultima from the elements for worry-free use in any conditions. Available in a range of sizes with both angled and straight designs.

65 - 45° #52248 80 - straight #52254
65 - straight #52249 100 - 45° #52252

TRIPODS

Anchor your sport optics with our TrailSeeker and Regal tripods. The heavy-duty Regal tripod has a smooth, easy-to-use fluid pan head and adjustable legs for setting in a variety of configurations. The quick-release plate helps you set up and break down in seconds and doubles as a balance rail, allowing you to find the perfect center of gravity.

Our lightweight, yet stable TrailSeeker tripod features a two-way fluid pan head for smooth, fast spotting and tracking with a large range of motion and single-tension pan and tilt adjustment. Flip-lever leg locks, multiple leg angles, rubber feet, padded leg wraps, and a retractable balance hook make it adaptable for all types of terrain.

With all these features and more, these are the perfect tripods for avid optics users.

REGAL TRIPOD #82052

TRAILSEEKER TRIPOD #82050

CAMOUFLAGE BACKPACK

Carry everything you need in one tough, functional pack with Celestron's camouflage backpack. Keep organized with six zippered accessory pockets and Velcro straps inside the main compartment. Additional gear can attach to the pack's exterior; PALS-compatible webbing accepts external pouches and other gear to conserve space inside. Padded shoulder straps provide extra cushioning while waist and chest straps customize the fit and take weight off your shoulders.

#81000

EYEPIECES

Celestron's 1.25" spotting scope eyepieces, available in Wide Angle, Zoom, and Long Eye Relief models, feature our proprietary XLT optical coatings for maximum light transmission, increased resolution, and contrast. Waterproof and nitrogen purged, you can use these eyepieces confidently in wet conditions. They're also digiscoping ready. Simply remove the eye cup, attach the T-ring adapter, then attach your DSLR camera with compatible T-ring (not included).

ASTRONOMICAL EYEPIECE COMPATIBILITY

Select Celestron spotting scopes like the Regal M2, Hummingbird, Catadioptric, and TrailSeeker allow the use of all Celestron 1.25" eyepieces. Swap in your astronomical eyepieces for a different focal length or field of view to customize your observing experience.

LIMITED LIFETIME WARRANTY

Rest assured that your Celestron sport optics purchases are guaranteed against defects for the product's usable lifetime.

KEY TECHNOLOGIES

Each Celestron optical product is engineered for the highest performance, durability, and quality in its class. From lightweight-yet-sturdy weatherproof housings that withstand the elements to state-of-the-art lens coatings for unrivaled image clarity. With Celestron optics you'll get a lifetime of viewing enjoyment at an unbeatable value.

WATERPROOF

The housing of the optic is sealed, preventing moisture and dust from getting inside.

ED LENS

Extra-low dispersion glass. Optical glass with special dispersion properties that dramatically reduces chromatic aberration, rendering razor sharp images with superb color correction.

XLT COATING

Celestron's proprietary lens coating. First developed for telescopes, this coating maximizes light transmission through the optical path for brighter images and increased resolution and contrast.

DIELECTRIC COATED

A highly reflective coating used in roof prisms to cause the prism surface to act as a dielectric mirror, improving light transmission, contrast and color fidelity. Reflectivity of a dielectric coated prism is greatly improved compared to either an aluminum or silver mirror coating.

PHASE COATED

A coating applied to one surface of a roof prism to increase contrast and sharpness by correcting out of phase light.

FULLY MULTI-COATED

Every lens surface is coated multiple times with anti-reflective coatings to improve the color and contrast of an image and to maximize brightness.

MAGNESIUM ALLOY

The main housing of the optic is constructed of a magnesium alloy. This reduces weight without sacrificing the structural integrity necessary for hard use in the field.

NITROGEN PURGED

The internal housing is purged of air and replaced with dry nitrogen gas, preventing the buildup of moisture and fogging of the internal lenses.
